

CHRIS DOVER

AI-First Founding Engineer | Agents, Crypto Payments, Trading Systems, Defense Tech

Scottsdale, AZ | Remote / US | chrisdover@gmail.com | +1-310-467-6637 | [linkedin.com/in/chrisdmacro](https://www.linkedin.com/in/chrisdmacro) | github.com/chrisdover | x.com/chrisdmacro

Summary

- AI-first founder-engineer: ships solo-built production systems across agents, full-stack products, data infrastructure, trading systems, and crypto/payment workflows.
- Grew Pollinate Trading, a solo-built fintech platform for systematic traders, to \$250K+ ARR.
- Former 500 Startups founder; Geniusly exited via acquisition of the technology and team.
- 7 years in Iraq supporting State Department, DoD, and commercial high-threat operations; strong fit for defense tech, fintech, crypto, and AI-agent startups.

Technical & Domain Skills

AI / Agents: AI agents, LLM workflows, Claude Code, Codex, Cursor, Gemini, tool use, evals, guardrails, agentic payments

Full Stack: Python, TypeScript, JavaScript, React, Next.js, Node.js, HTML, CSS

Data / Infra: PostgreSQL, SQL, AWS, Vercel, Supabase/Neon, APIs, automation, analytics dashboards

Markets: Trading systems, algorithmic trading, quantitative finance, crypto/web3/DeFi, risk systems

Operations: Founder judgment, product ownership, security operations, defense/dual-use domain fluency, EN/ES

Experience

Founder | Pollinate Research *Remote* | 2026-Present

- Building x402 payment-agent workflows on crypto-native rails, including Coinbase Commerce/x402-style payment flows for autonomous AI/payment execution.
- Use Claude Code, Codex, Cursor, and Gemini daily to design, build, review, debug, and document agentic software; constantly test new AI development tools and build small workflows around the ones that improve throughput.
- Focused on production-grade agent primitives: tool orchestration, API integrations, workflow state, payment logic, guardrails, observability, and evaluation of task completion.

Founder & Developer | Pollinate Trading *Remote* | 2022-Present

- Grew solo-built fintech platform for systematic traders to \$250K+ ARR, owning product, frontend, backend, data, infrastructure, backtesting, deployment, and customer workflows.
- Built the trading research stack end-to-end: market-regime analysis, signal systems, risk dashboards, automated alerts, subscriber workflows, and production operations.
- Ships and maintains full-stack production systems using Python, React/Next.js, Node.js, PostgreSQL/SQL, APIs, cloud deployment, and AI-assisted coding workflows.

Founder / AI Product Builder | Centinela Intel *Remote* | Side Project

- Achieved roughly 95% automation in OSINT intelligence gathering by building a side project from scratch for LATAM-focused corporate security and executive protection teams.
- Turns noisy OSINT, regional threat context, and operational reporting into structured outputs that security teams can review, trust, and act on.

Founder | Geniusly (500 Startups) *San Francisco, CA* | 2013-2014

- Founded predictive risk analytics startup for transportation; selected for 500 Startups accelerator and exited via acquisition of the technology and team.
- Led product development, predictive analytics, investor narrative, fundraising, customer discovery, and go-to-market from zero to acquisition outcome.

Operations / Security Leadership | Control Risks, Logistics LatAm, Triple Canopy *Latin America / Middle East* | 2004-2014

- Spent 7 years in Iraq supporting State Department, DoD, and commercial high-threat protection operations; later built enterprise security programs across Colombia and Mexico.
- Directed multinational operations for Triple Canopy across the Middle East, including 5,000+ personnel, 24/7 tactical operations centers, and \$100M in U.S. government equipment.

Selected Builds

- Pollinate Research: x402 payment-agent workflows for autonomous AI/payment execution - <https://pollinateresearch.com>
- Pollinate Trading: solo-built fintech/trading platform grown to \$250K+ ARR with dashboards, signal systems, backtesting, alerts, and subscriber workflows - <https://pollinatetrading.com/builds>
- Centinela Intel: side project built from scratch; 95% automated AI-assisted OSINT/security intelligence product for high-risk LATAM environments.
- Enfocado Capital: advisory/holding company for crypto, trading systems, AI/product builds, and global-security consulting; operated a crypto hedge fund across multiple market cycles.

Credentials

500 Startups alum; former founder with exit | U.S. Marine Corps infantry team leader | Certified Protection Professional (CPP), ASIS International | U.S. Department of State high-threat protection, driving, and firearms instructor certifications | Associate's Degree, Business Administration & Management, Barstow Community College | Languages: English native, Spanish fluent
